Play cards
into the trick.

Can you play higher?

Don't get caught with 2s
at the end of a hand!

LADDER-CLIMBING GAME WHERE 2s ARE THE HIGHEST

kaleiDOS allows players to play singles, pairs, trips, and 5 different 5-card combinations into a trick. In addition, card suit offers a hierarchy, so a 7 triangle is beaten by a 7 pentagon. A pair of 10s where the strongest suit is a pentagon can be beaten by a pair of 10s with the hexagon suit. Even the various 5-card combinations have a hierarchy: a straight is beaten by a full house is beaten by a 4-of-a-kind plus 1. In addition, 1s and 2s are larger than 15s, but don't get stuck with 2s in your hand if someone goes out – you will increase their score!

- **Colorful theme:** The shapes and colors offer an easy guide to remembering hierarchy of suits.
- **Classic gameplay:** Fans of Tichu and other ladder-climbing games will enjoy this.
